

The Second Biden/Harris Assassination Attempt Against Donald Trump: What is to be Done?

When Donald Trump said in his debate with Kamala Harris that he probably took a bullet in the head because of Harris' weaponization of the Department of Justice against him and the "things she says about him, that he's a threat to democracy," he was spot on.

Beginning with Joe Biden's prime time rant at Independence Hall in Philadelphia, on September 1, 2022, bathed, appropriately in satanic red hues with two uniformed Marines standing guard in the foreground, Joe Biden and Kamala Harris have engaged in a sustained campaign to brainwash the American population to believe that Trump is a new Hitler who will destroy democracy and their freedoms. The media has amplified this poison daily.

To prevent another attempt, the American public must call Joe Biden and Kamala Harris directly to account for this murderous spree and demand that they create a security shield around Donald Trump as if they were protecting a member of their family. This is a call to action which the entire nation takes up at this turning point in our history. This White House is responsible for Butler and Palm Beach. This White House must fix it, and do so immediately, lest we lose the nation.

In 2023, Trump was indicted no less than four times criminally in a lawfare scheme hatched by the Biden Justice Department after Biden told a press conference on November 9, 2022, "Well, we just have to demonstrate that he will not take power by — if we — if he does run ... I'm making sure he, under legitimate efforts of

our Constitution, does not become the next President again." When the American population revolted against this lawfare and the desecration of our once sacred justice System, the spokesman for the Washington/London foreign policy consensus, Robert Kagan, took to the pages of the *Washington Post* to advocate that only an assassination would cure the Trump problem.

Joe Biden and Kamala Harris control the Secret Service, and the levels of protection provided to Donald Trump. Prior to the Butler, Pennsylvania event, the detail assigned to Trump sought further manpower and resources. They were denied. An honest American president, seeing the complete failure of the Secret Service at Butler, and knowing that Trump faces assassination threats from terrorists in the Middle East and from murder squads operating out of Ukraine, would have picked up the phone and called his military chiefs and intelligence chiefs and ordered them to create a working security shield around his political rival. He or she would also investigate the catastrophic security failure at Butler to determine whether it was willful and who was involved. Further, an honest American president would have told the FBI and Secret Service to immediately report to the American people everything they know about the Butler murderer, Thomas Matthew Crooks, including information from his encrypted foreign accounts.

Neither Biden or Harris could ever claim the decency or competence which should attend the American presidency. Instead, Biden and Harris and the media attempted to memory hole Butler, wiping it from the People's

consciousness while continuing to inflame the security environment around Donald Trump. NBC News said last night that the second assassination attempt was Trump's fault for his heated rhetoric about Haitian immigrants in Springfield, Ohio. That rationalizes the killing of the man who well over half the nation supports to be the next President.

Now, the man who attempted the Trump's murder Sunday, Ryan Wesley Routh, is a mercenary recruiter for Ukraine in the war which Biden and Harris provoked, and which Trump has vowed to end. We have another security failure. Routh got within 400 yards of Trump with a scoped rifle on a golf course on Sunday where Trump was playing, UNANNOUNCED and secret.

Routh, an obvious mental case with a criminal record, went to Ukraine to recruit mercenaries from throughout the world to fight for the Ukrainians. He filmed propaganda with the neo-Nazi Azov battalion. He was interviewed favorably by the *New York Times* and *Newsweek*. You don't do this without a connection to U.S. intelligence or other intelligence agencies.

Ukrainians have state sponsored killer squads which have targeted Americans opposing the war. The full spectrum information warfare operations now being conducted by Biden/Harris against the American people were first tested in the Ukrainian coup overseen by then Vice President Biden and the British foreign office in 2014. An added factor is that Ukraine is losing this war badly, having lost half its population to migration or death or disability from the war itself. So, Biden and Harris now propose providing American assistance to targeted missile attacks in Russia itself which, Putin has said, would mean we are at war with Russia.

While there will be investigations, the present FBI has proven itself completely untrustworthy

if not complicit. The SAC at the Miami FBI office, Jeffrey Veltri, is such a Trump hater that he had to be told by his FBI bosses to clean out his social media accounts in order to allow his promotion to Miami SAC. Florida Governor Ron DeSantis has vowed to run an independent state investigation and that is a good thing. But what will allow Donald Trump to live and not be hunted, and what will ensure that this election is a fair contest, a contest which Trump and the American people will win, allowing this Republic to survive, is for the People to rise up now with a singular focus:

Force the White House to provide the military, civilian, and other resources to protect Trump and his family and to take public personal responsibility for ensuring that they are safe. It is not acceptable to fob this off on the failed Secret Service or dodge it in any other way. . Journalists who support Trump, Congressmen and state government representatives, and the People themselves must take up this call and make it a central priority of their lives until it is accomplished.
